

# GREEN DATA CENTERS

## Powering Sustainable Digital Solutions for Tribal Communities

In the digital age, data centers are more than just a necessity – they are the heart of a community's digital infrastructure. At True Star Energy, we are proud to offer Green Data Centers tailored for Native American Tribes.

**Our Green Data Centers can be installed in a variety of locations, including:**

Existing commercial or community buildings

Newly developed infrastructure projects

Tribal lands with available space and connectivity

Casinos

### Investing in a Green Data Center provides a multitude of benefits:

#### Data Sovereignty

Our data centers are designed to reduce environmental impact while delivering efficient, reliable service

#### Job Creation

The development and maintenance of a data center can create local jobs and stimulate economic growth.

#### Efficiency

Our data centers are designed to reduce environmental impact while delivering efficient, reliable services.

#### Cost-Effective

Green Data Centers use less energy, leading to substantial cost savings over time.
